

Work remote. Work safe. Allworx will help.

Allworx is in the front lines of business communications systems that facilitate remote work by employees. 20 years ago, our systems allowed remote work without extra equipment or hassle – and today we provide many remote work options via deskphones, mobile devices or laptops.

For example – our popular Reach™ mobility system.

Our **Reach mobility platform** allows employees to take their deskphone features with them on their smartphones. Wherever they work, they communicate with customers and staff just as if they were in the office. Of course this includes making calls through the company system, but much more:

- ✓ Transfer, hold, and park calls with a single touch.
- ✓ Make easy three-way calls.
- ✓ Access call history, see parked calls, and call into scheduled conference calls.¹
- ✓ Search across Allworx system users and extensions, and personal mobile contacts.
- ✓ Check voicemail messages.
- ✓ Change presence setting.
- ✓ Personal contact sharing, instant call hand-offs, and more!

Join us in the front lines of the work remote evolution.

"It's been a terrific productivity tool for us. We're often at meetings both on and off-site, and it's great to be able to stay connected and manage our phone calls and voice mails easily – no matter where we are"

– Jeff Kitner, North Dallas Chamber of Commerce, Chief Operating Officer

1. Accessing scheduled calls via Reach requires an Allworx Conference Center software license key.
